Visual_Loquat_8242	neutral	And i am still working on [pygitzen](https://github.com/SunnyTamang/pygitzen) Just released the beta version. Now i have to work on interactive features but suddenly I was washed away with pty streaming and was thinking how i can incorporate it and is it even used for the use case. So yeah still tinkering around.
Interesting-Frame190	positive	Still working on PyThermite https://pypi.org/project/pythermite/ Ive recently added indexing support for many to many relationships and am looking into a custom list implementation to support tracking list mutatis mutandis.
vighneshbirodkar	positive	I am building a simple website to help people learn Python. [https://vighneshbirodkar.github.io/alpy/] (https://vighneshbirodkar.github.io/alpy/) It is very early and I have only written about simple strings and numbers so far. I am looking for some early feedback, let me know what you think.
